(54) **DELAYED RELEASE DRUG FORMULATION**

(57) Delayed release of drug to the colon is achieved from delayed release formulation comprising a core and its coating. The core comprises the drug, and coating comprises outer layer and at least one layer between the core and outer layer selected from the group consisting of isolation layer and inner layer. Outer layer comprises a mixture of first polymeric material which is susceptible to attack by colonic bacteria, and second polymeric material which has pH threshold at about pH 5 or above. Inner layer comprises third polymeric material which is soluble in intestinal fluid or gastrointestinal fluid, and said third polymeric material is selected from at least partially neutralised polycarboxylic acid and non-ionic polymer. In embodiments wherein third polymeric material is non-ionic polymer, inner layer comprises at least one buffer agent and a base. Isolation layer comprises non-ionic polymer soluble in intestinal fluid or gastrointestinal fluid. Outer layer is applied directly to inner or isolation layer using coating preparation formed by combining first polymeric material in aqueous medium with second polymeric material in organic medium. Advantages of formulations according to present invention include accelerated release of drug when exposed to colonic conditions and reduction or elimination of food and/or alcohol effect on drug release after administration.
